Citations in Org Mode Export for Typst

Randy Ridenour

July 16, 2026

These are examples of citation exports using my custom ox-rlr-typst Org mode exporter for Typst. All of the following are using the Chicago Author-Date style.

The default citation, `[cite:@Ridenour2019b]`, prints the author and year in parentheses:

(Ridenour 2019)

(Ridenour 2019, for more)

To add a page or page-range reference, use `[cite:@Ridenour2019b 7-10]`:

(Ridenour 2019, 7-10)

`[cite/text:@Ridenour2019b]` moves the author name outside the parentheses:

see Ridenour (2019) for more.

To print the author name only, use `[cite/author:@Ridenour2019b]`:

Ridenour

Likewise, for only the year, use `[cite/na/b:@Ridenour2019b]`:

2019

`[cite/bibentry:@Ridenour2019b]` prints a standard biliography entry:

Ridenour, Randy. 2019. “Abandoning Jubilee: The Structural Causes of Poverty.” *Review & Expositor* 116 : 6–15

Finally, `[cite/nocite:@Ridenour2019b]` prints nothing, but adds the reference to the bibliography.

Bibliography

Ridenour, Randy. 2019. “Abandoning Jubilee: The Structural Causes of Poverty.” *Review & Expositor* 116 : 6–15.
